## **Election/Restriction**

### ***Introduction***

1. The following is an election/restriction in response to the communications received on July 12, 2006. Claims 1-7 and 11-13 are restricted in this application. Claims 8-10 were previously cancelled.

### ***Interview Summary***

2. Applicants initiated an interview on July 11, 2006. Applicants submitted preliminary amendments on April 03, 2002 that are not in the application file. An office action regarding the claims submitted December 07, 2001 including the cancellation of claims 8-10 submitted on July 26, 2002 was mailed on February 16, 2002. Applicants have a postcard confirming receipt of the preliminary amendments by the Patent and Trademark Office. Receipt of the preliminary amendments and the postcard dating the USPTO's receipt of the preliminary amendments from Applicants is acknowledged.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-7 are drawn to a method for the evaluation and selection of maintenance plans, classified in class 705, subclass 7.
  - II. Claims 11-13 are drawn to a method for planning repairs, classified in class 705, subclass 7.
4. The inventions are distinct, each from the other because of the following reasons:  
Restriction to one of the following inventions is required under 35 U.S.C. 121:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as evaluating and selecting an appropriate maintenance plan based on the collection of user satisfaction data. Subcombination II has separate utility as a method for planning recurring and non-recurring repairs. See MPEP § 806.05(d).

A telephone call was made to Mark J. Thronson (Reg. No. 33, 082) on August 2, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kalyan K. Deshpande whose telephone number is (571) 272-5880. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (571) 272-6729. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
